

Summary

Results-driven senior software engineer with extensive experience in tools and advanced concepts. Proven ability to design scalable solutions, mentor junior engineers, and drive technical innovation.

Summary

- Results-driven senior software engineer with extensive experience in tools and advanced concepts.
- Proven ability to design scalable solutions, mentor junior engineers, and drive technical innovation.

Skills

- Python
- ReactJS
- Django or Flask
- Containerization (Docker) [Needs to prepare]
- Orchestration (Kubernetes)

Experience

- Designed and implemented scalable API solutions using Python, ReactJS, and Django/Flask.
- Mentored junior engineers on Agile development methodologies and code quality standards.
- Driven technical innovation by implementing new tools and technologies, such as Docker and Kubernetes. [No measurable impact provided]

Projects

- Completed a small project using Docker to improve containerization skills.
- Implemented scalable solutions using ReactJS and Flask to improve performance.

Education

- Hold a bachelor's degree in Computer Science with a focus on software engineering. [No relevant experience provided]

Certifications
